Data Visualization with Python

Cheat Sheet : Plotting with Matplotlib using Pandas

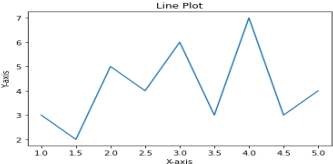

| Plot Type | Description | Pandas Function | Example |
|-----------|---|--|--|
| Line Plot | Shows trends and changes over time | <code>DataFrame.plot.line()</code> <code>DataFrame.plot(kind = 'line')</code> | <code>df.plot(x='year', y='sales', kind='line')</code> |
| Area Plot | Displays data series as filled areas, showing the relationship between them | <code>DataFrame.plot.area()</code> <code>DataFrame.plot(kind = 'area')</code> | <code>df.plot(kind='area')</code> |
| Histogram | Displays bars representing the data count in each interval/bin | <code>Series.plot.hist()</code> <code>Series.plot(kind = 'hist', bins = n)</code> | <code>s.plot(kind='hist', bins=10)</code> <code>df['age'].plot(kind='hist', bins=10)</code> |
| Bar Chart | Displays data using rectangular bars | <code>DataFrame.plot.bar()</code> <code>DataFrame.plot(kind = 'bar')</code> | <code>df.plot(kind='bar')</code> |

Visual

| Plot Type | Description | Pandas Function | Example | Visual |
|--------------|--|---|--|--|
| Pie Chart | Displays data as a circular plot divided into slices, representing proportions or percentages of a whole | <pre>Series.plot.pie() Series.plot(kind = 'pie') DataFrame.plot.pie(y, labels) DataFrame.plot(kind = 'pie')</pre> | <pre>s.plot(kind='pie', autopct='%1.1f%%') df.plot(x='Category', y='Percentage', kind='pie')</pre> |  |
| Box Plot | Displays the distribution of a dataset along with key statistical measures | <pre>DataFrame.plot.box() DataFrame.plot(kind = 'box')</pre> | <pre>df_can.plot(kind='box')</pre> |  |
| Scatter Plot | Uses Cartesian coordinates to display values for two variables | <pre>DataFrame.plot.scatter() DataFrame.plot(x, y, kind = 'scatter')</pre> | <pre>df.plot(x='Height', y='Weight', kind='scatter')</pre> |  |

Cheat Sheet : Plotting directly with Matplotlib

| Plot Type | Description | Matplotlib Function | Example | Visual |
|-----------|------------------------------------|-----------------------|---|---|
| Line Plot | Shows trends and changes over time | <pre>plt.plot()</pre> | <pre>plt.plot(x, y, color='red', linewidth=2)</pre> |  |

| Plot Type | Description | Matplotlib Function |
|-----------|-------------|---------------------|
|-----------|-------------|---------------------|

| | | |
|-----------|-------------------------------------|---------------------------------|
| Area Plot | Display data series as filled areas | <code>plt.fill_between()</code> |
|-----------|-------------------------------------|---------------------------------|

| | | |
|-----------|--|-------------------------|
| Histogram | Displays bars representing the data count in each interval/bin | <code>plt.hist()</code> |
|-----------|--|-------------------------|

| | | |
|-----------|--------------------------------------|------------------------|
| Bar Chart | Displays data using rectangular bars | <code>plt.bar()</code> |
|-----------|--------------------------------------|------------------------|

| | | |
|-----------|--|------------------------|
| Pie Chart | Displays data as a circular plot divided into slices, representing proportions or percentages of a whole | <code>plt.pie()</code> |
|-----------|--|------------------------|

| | | |
|----------|--|----------------------------|
| Box Plot | Displays the distribution of a dataset along with key statistical measures | <code>plt.boxplot()</code> |
|----------|--|----------------------------|

| | | |
|--------------|--|----------------------------|
| Scatter Plot | Uses Cartesian coordinates to display values for two variables | <code>plt.scatter()</code> |
|--------------|--|----------------------------|

| | | |
|-------------|---------------------------------------|-----------------------------|
| Subplotting | Creating multiple plots on one figure | <code>plt.subplots()</code> |
|-------------|---------------------------------------|-----------------------------|

Example

```
plt.fill_between(x, y1, y2, color='blue', alpha=0.5)
```

```
plt.hist(data, bins=10, color='orange', edgecolor='black')
```

```
plt.bar(x, height, color='green', width=0.5)
```

```
plt.pie(sizes, labels=labels, colors=colors, explode=explode)
```

```
plt.boxplot(data, notch=True)
```

```
plt.scatter(x, y, color='purple', marker='o', s=50)
```

```
fig, axes = plt.subplots(nrows=2, ncols=2)
```

Visual

| Plot Type | Description | Matplotlib Function |
|---------------|--|-----------------------|
| Customization | Customizing plot: adding labels, title, legend, grid | Various customization |

about:blank

Example

```
plt.title('Title')
plt.xlabel('X Label')
plt.ylabel('Y Label')
plt.legend()
plt.grid(True)
```

Visual
